Key Skills: MERN Stack

Designed and developed a React-based music player UI with reusable components, responsive layouts, state management for audio playback, REST API integration, and Git-based version control.

PROJECTS

On-Demand Fuel Delivery Web App

Key Skills:

HTML CSS JavaScript React.js REST API Integration Git & GitHub Node.js Express.js MongoDB
Leaflet Maps api

Developed a responsive on-demand fuel delivery web application with a PWA-enabled React frontend, integrated Leaflet Maps for location-based interactions, and implemented a clean, user-friendly UI for smooth order tracking across devices.

BeatBox – Online Music Streaming App

Key Skills:

HTML CSS JavaScript React.js REST API Integration Responsive UI Design Git & GitHub PostgreSQL
Node.js Express.js

Developed a fully responsive web-based music player using HTML, CSS, JavaScript, and React, featuring smooth audio playback, state-managed controls, and a clean, user-friendly interface optimized for multiple devices. Implemented reusable UI components and integrated APIs for dynamic music content.

BurnWatch — AI-Powered Urban Garbage Burn Detection & AQI Impact Predictor

Key Skills: Leaflet.js Chart.js LightGBM Prophet Pandas NumPy

BurnWatch — AI-Powered Urban Garbage Burn Detection & AQI Impact Predictor Built a full-stack platform that detects urban garbage dump fires across Indian cities using NASA FIRMS satellite data, displayed on a real-time Leaflet.js map with burn location, severity, and AQI impact. Engineered a hybrid ML classifier using LightGBM and GPS boundary rules to separate garbage burns from forest fires with ~87% accuracy and zero training data, with automated municipal alerts via Twilio and a 7-day burn risk forecast.
